Main section headline:

A job interview is a musical performance.

Main section body text:

An interview is not a place to wing it, as I learned long ago. I figured out what exactly to prepare for and where to stand your ground. The rest came naturally. My Guided Interview System, from years of experience, will get you going on the path to success.

I was 26 when I got this call from a famous finance major. I was very confident in my abilities. I breezed in for an interview with a senior director in the company... and blew it!

My Guided Interview System is a 4-week (2 sessions a week) intensive, one-on-one training course borne out of my personal experience. It is a no-fluff, practice-oriented program that guides you from the early pre-interview prep to how to deal with stressful interviews.

I've also been on the other side of the table as a senior recruiter for Fortune 50 companies. I know the game. I teach you the essence. You add your dash of personality and improvisation.
